WEEK 4

Aim

To design and develop a **Student Login and Central Placement Portal** with input validation using HTML, CSS, and JavaScript, and redirect the user to a success page after successful login.

Description:

This experiment involves creating an **ANITS Central Placement Portal** that provides a user login interface with username and password fields. JavaScript is used to validate the login input and ensure that the required fields are entered correctly.

After successful validation and login, the user is redirected to the success page using the Browser Object Model (BOM) property window.location.href = "success.html". The success page displays a login success message, login information, and important placement-related notices. The webpage is designed using HTML and CSS with a structured layout, navigation menu, background styling, and responsive design.

Program code:

Login.html:

```
<!DOCTYPE html>
<html>
<head>
    <title>ANITS - Login</title>

    <style>
        body {
            margin: 0;
            font-family: Arial;
            background-image: url("bgimage.jpg");
            background-size: cover;
            background-position: center;
```

```
    background-image: url("background.jpg"); }

.header {
    text-align: center;
    color: white;
    padding: 30px;
    font-size: 22px;
    font-weight: bold;
}

.login-box {
    width: 300px;
    margin: 20px auto;
    padding: 20px;
    background-color: rgba(220, 230, 225, 0.75);
    border-radius: 5px;
}

h3 {
    text-align: center;
    color: blue;
}

label {
    color: blue;
    font-size: 13px;
}

input {
```

```
            width: 100%;
            padding: 8px;
            margin: 5px 0 12px 0;
            box-sizing: border-box;
            border: none;
        }

        button {
            width: 100%;
            padding: 8px;
            background-color: #2878b8; color:
            white;
            border: none;
            cursor: pointer;
        }

        button:hover {
            background-color: #155a8a;
        }
    </style>
</head>

<body>

    <div class="header">
        ANITS - Central Placement Portal
    </div>

    <div class="login-box">
```

```
        <h3>User Login</h3>

        <form onsubmit="login(); return false;">

            <label>Username</label>
            <input type="text" id="username" placeholder="Username">

            <label>Password</label>
                                <input type="password" id="password" placeholder="Enter Password">

            <button type="submit">Login</button>
        </form>
    </div>
    <script>
        function login() {
            var username = document.getElementById("username").value; var password =
            document.getElementById("password").value; if (username == "venky" &&
            password == "kavya143") { window.location.href = "success.html";
            }
            else {
                alert("Invalid Username or Password");
            }
        }
    </script>
</body>
</html>
```

Output:
Success.html:

```
<!DOCTYPE html>
<html>
<head>
    <title>Login Successful</title>

    <style>

        body {
            margin: 0;
            font-family: Arial;
            background-image: url("bgimage.jpg");
            background-size: cover;
            background-position: center;
            color: #183a70;
        }

        /* Header */
        .header {
            height: 80px;
            background-color: rgba(20, 50, 70, 0.85); color:
            white;
            display: flex;
            align-items: center;
        }
        .logo {
